ASST. CITY ENGINEER

Sewer Separation Project in Your Neighborhood

SIGN OF PROGRESS

Date: _____

To: Residents of _____ Between _____ & _____

During the week of _____, the Contractor will be performing the following Activities as marked in the vicinity of your home.

- Placing new sanitary sewer and/or storm sewer.
- Replacing sanitary lead services from the back of the sidewalk to the existing sanitary sewer.
- Placing new water main approximately 6' deep.
- Transferring water main services from the old water main to the new water main.
- Making water main connection(s). If your water supply is scheduled to be off, you will be notified with a separate pink "Water Shut Off" notice.
- Constructing pavement and/or driveway apron.

Because of the above construction activities, you may experience the following:

- Please remove your car from the driveway before 7:00 a.m. Make alternate arrangements for parking during the daytime.
- You may not have access to your driveway/garage during the daytime.
- The ongoing construction may cause a disturbance to the existing water main which could result in a potential water main break. These are unplanned water shut offs. The City staff will notify you at their earliest about water shut offs resulting from these emergency water main breaks. We hereby encourage you to have bottled water available as a precautionary measure.
- When your water supply is back in service, please flush your water lines immediately until the water is clear.
- You will not be able to access your driveway and garage for two (2) weeks. The two (2) week period allows for excavating, grading, setting forms, paving and curing of the new concrete surface.

We appreciate your continuing understanding and cooperation. Please contact Soud El-Jamaly at (313) 801-8578 or Kelli Moore at (313) 613-1994, the City's representatives in the field for any questions.
